

A large, modern sailboat with three tall masts and large purple sails is shown sailing on a deep blue sea under a clear sky. The boat has a white hull and a wooden deck. A small flag is visible on the left side of the boat. The text 'Baracuda Valleta' and 'Perini Navi 50m' is overlaid on the bottom right of the image.

Baracuda Valleta

Perini Navi 50m

Baracuda Valleta

The Superyacht BARACUDA VALLETTA was designed by Perini's in-house naval architects teamed with New Zealander Ron Holland.

BARACUDA VALLETTA features recognizable Perini Navi trademarks including her deckhouse lines, with curved windows and long flying bridge.

Her aluminum hull, tapering and deep semi-compensated rudder, extended waterline, and lead ballasted swinging keel, makes this superyacht the latest evolution of the successful 50 meter series .

This ketch also makes a strong visual impact primarily by the colour of the hull which is metallic grey with shades

of gold and the sails which come in flaming purple.

This contemporary appeal is also echoed in the portholes, which are an unusual rectangular shape.

The luxury sailing yacht BARACUDA VALLETTA features many innovations including a canting keel that changes from a 4m draught with her keel up to a 9.7 m draught with her keel down.

The transom door can be cleverly opened almost entirely to transform into a large platform for both tender launching and swim access.

The hydraulically operated swimming platform can be submerged 8 inches below the water's surface accessed by guests via a staircase on the aft deck.

Sailing Yacht BARACUDA VALLETTA's main deck is one level and is 22 meters in length from the aft sunken cockpit throughout the inner wheelhouse.

The extended windows provide natural lighting and panoramic view.

The main deck is conceived as open living space, with no partitions, with the aim to keep a much clearer, unencumbered visual field than is conventionally the case on sailing yachts of this type.

The partial central wall in the salon was chosen not only for the subtle beauty of its colour and texture, but also for the way it serves to dematerialize the central stair volume.

The master suite and 4 guests cabins are all located on the lower deck.

S/Y BARACUDA features interior design by British architect John Pawson, guru of the modern minimalism.

The style and project philosophy are extreme simplicity and clear lines with concepts of light, space and proportion.

Luxury Perini Navi sailing yacht BARACUDA VALLETTA has a state-of-the-art sailing system with aluminum, ketch rigged masts that are 56.7 and 42.9 meters from the DWL. Perini also designed, engineered and manufactured the carbon fibre electric in-boom furling system and the captive reel winches that handle a sail plan of 1,418 square meters, which consists of the main and mizzen sails plus genoa and blade jib.

INTERIOR

A modern interior staircase with wooden steps and a glowing light strip on the right side. The word 'INTERIOR' is written vertically in white on a dark grey background on the left.
